

FOREST THERAPY INTRODUCTION

Enrol in the **INFTA-Certified Forest Therapy Introduction Workshop, 6-10 March 2019.**

Experience a first comprehensive overview and insight into the health practice of Forest Therapy. Participate in a comprehensive five-day, all-inclusive workshop at the salubrious and tranquil setting of the **Yarra Ranges National Park.**

5-DAY EXCLUSIVE WORKSHOP ONLY A\$ 2,500

Forest Therapy is an evidence-based framework to reduce stress and blood pressure, strengthen the immune and cardiovascular systems, boost energy, mood, creativity and concentration. Science and research have proven that time in nature makes you happier, healthier and smarter! In Japan, the practice is called “*Shinrin-yoku*” or “forest immersion”. During the workshop you will be invited to connect with and experience the psychological, emotional and spiritual healing of nature in beautiful, lush forested trails in the Yarra Ranges. Participants will be guided by professionally trained **INFTA-Certified Forest Therapy Guides** through a plethora of mindfulness practices and mentoring techniques. Do not miss this unique experience of sensory and nature connection best-practice which supports healing and wellness in nature. *Pallotti College* with its 200 hectares of spectacular landscape and the nearby Redwood Forest offer an ideal space for your own path of learning, healing and well-being through nature.

CERTIFIED FOREST THERAPY GUIDE TRAINING

The workshop is suited for anyone interested in this innovative form of preventive medicine and Public health, incl. those who are active in clinics, spas, specialized resorts, hotels and wellness centers, in Government departments, organisations, companies or running their own practice. **INFTA's Forest Therapy Introduction** adheres strictly to the **International Core Curriculum of Forest Therapy** validated by experts from over 20 countries in Europe, America, Asia and Australia in 2017.
